

Millers Mutual Group Selects Duck Creek Rating Solution

Duck Creek's prebuilt commercial lines templates will support Millers Mutual Group's goal of online rating and quoting for all their business lines.

Bolivar, MO, Sept 02, 2009 - Duck Creek Technologies, Inc., a leading provider of software and services for the insurance industry, today announced that multiline Property & Casualty carrier Millers Mutual Group has selected Duck Creek Rating™ as its solution for online rating and quoting. This selection is an integral component in Millers Mutual's strategy to modernize their IT infrastructure by utilizing the prebuilt Duck Creek Commercial Lines Templates™ and bureau-based content maintenance service.

Customizable commercial line templates that include state specific policy-rating rules and tables will be implemented by Millers Mutual for all lines of business, with plans to start with their business owner's policy lines (BOP). This is the second phase of Millers Mutual's modernization strategy—to fully offer their independent agents the ability to quickly communicate and rapidly process business with the carrier.

"We chose Duck Creek because of its agility and breadth of functionality across commercial business lines. The modern .NET architecture enables us the needed flexibility in leveraging our current proprietary ISO programs, coupled with giving us the opportunity to modify insurance products for the future. The bureau-based content maintenance service allows us to streamline our bureau rate adoption process and increase our efficiency," commented Larry Fortin, CIO of Millers Mutual Group.

"We welcome Millers Mutual Group as they execute their IT infrastructure modernization project. We look forward to our partnership as they implement our solutions. Duck Creek is proud to provide a well engineered, modern technology solution, which enables carriers like Millers Mutual to improve their operational efficiencies and position them for continued growth," stated Steve Hall, CEO of Duck Creek Technologies.
